**Psychologist | Masters in Education**

## ABOUT ME

I channel my creativity into the development of innovative projects. This approach not only fulfills my professional aspirations, but also allows me to contribute to the well-being of my family. I focus on enhancing my team-work, assertive communication, and leadership skills through the management of several projects, complemented with expert implementation of Python, MySQL, and Java, along with my foundational knowledge as an electronics engineer.

## EDUCATION

Campuslands - 2024

**Junior Back-end Developer**

Universidad de Investigación y Desarrollo 2015-2020

**Electronic Engineer**

## PROJECTS

Simulation of the platform BetPlay using Java, implementing the SOLID methodology.

**CAMPUSLANDS - 2024**

Development of a university management system, including front-end development and creation of APIs using JavaScript.

**CAMPUSLANDS - 2024**

Implementation of a transversal project, combining artificial intelligence and front-end development to create a system where a vehicle learns to avoid other drivers autonomously.

**MAP-PROJECT - 2024**

Facial recognition analysis system, using AWS.

**THIS.DEV - 2024**

Entrepreneurial initiative to develop innovative business applications, employing Scrum and GitFlow methodologies.

**THIS.DEV - 2024**
